***DETAILED ACTION***

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, and 11-14, drawn to partitioned shared memory, classified in class 709, subclass 215.
- II. Claims 8-10, drawn to file allocation, classified in class 707, subclass 205.

Inventions I – II, are related as combination subcombination disclosed as usable together in a single combination. The combinations are distinct from each other if they are shown to be separately usable. In the instant case, the combination (I) as claimed does not require combination II as claimed, because process of clearing old data to make space for new data does not require subcombination of scheduling the record allocating or deletion. The combinations II has separate utility such as scheduling the files to be removed from one location. Therefore, the inventions are distinct; however, they could be usable together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 2161

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for one group is not required for the other groups, restriction for examination purposes as indicated is proper.

A telephone call was made to Christos A. Ioannidi on September 27, 2005, to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

This office action sets a one-month period for reply (restriction requirement), the applicant may obtain a two-month extension of time under 37 CFR 1.136(a) before being subject to a reduction of patent term adjustment under 154(b)(2)(C)(ii) and CFR 1.704(b).
